## Joint International Educational Symposium on Animal Welfare

**Animal welfare is the issue ... knowledge is the answer ... leadership is the result.**

### Swimming with the Tide

#### Animal Welfare in Veterinary Medical Education and Research

Animal welfare issues...once small whitecaps on the horizon, eventually they came together to form a wave.

Today that wave has become a swell...and many are catching a ride. It's time we stopped treading water and started learning, using, and teaching the skills and expertise necessary to become competent, knowledgeable animal welfare advocates.

Veterinarians, educators, researchers and students...this is YOUR chance to learn from and network with renowned international experts in animal welfare.

**Save the date and ride the wave: Nov. 9 – 11, Michigan State University, East Lansing, MI**
